Puget Sound Grown Liliums

ONE OF OUR LILY FIELDS

Sheffield Bulb Farm

Mr. and Mrs. George Sheffield

Vashon Island P.O. Burton, Wash.

CANDIDUM

(Ascension or Madonna Lily)

Handsome, large, fragrant, pure white flowers. Easy of culture; does best when left undisturbed after planting. Our bulbs are fresh from beds. Early June. Delivered August, September only.

DAVURICUM

One of the most reliable and hardy lilies. The flowers are reddish and of good size, and the plant with age attains a height of three to four feet in good soil. June.

EASTER LILY

Seedling from the beautiful Longiflorum, the Easter Lily of commerce. A grand lily with pure white funnel-shaped flowers often eight inches long. Hardy here and suitable for gardens.

ELEGANS IN VARIETY

The number of forms and varieties is legion, varying in color from pale lemon-yellow to rich orange-brown, embracing various tints of orange to almost red and from soft apricot to approaching crimson; varying also in flowering season. Stem roots. June-July.

SPECIOSUM MELPOMENE

(The lance-leaved lily)

This beautiful lily is deservedly one of the greatest favorites. The flowers are of daring as well as of beautiful form. The petals are well rolled back as well as being handsomely spotted. Perfectly hardy and appear to thrive well in any garden. The color is rich carmine on white ground, with crims^cn spots.

HENRYI

(The orange-yellow speciosum)

Too much cannot be said in praise of this fine lily; its constitution is of the hardiest; it is very free flowering, reaching six or more feet in height when established, and bearing up to 20 flowers, which are of a rich deep oragne-yellow, very telling in point of color and well set off by the deep green foliage. The fact that it is seen doing so well in so many gardens shows its sound constitution and good flowering qualities. It is one of the best lilies ever introduced, and one which we confidently recommend. Stem-rooting. Aug.-Sept., 6-8 feet.

PARDALINUM

(Leopard Lily)

This is one of the best lilies of the garden. It thrives well in any soil, but prefers a well-drained, moist situation. The strong stems are very leafy and produce numerous flowers. The petals are recurved, bright red, shading to orange with many rich, brown spots. Hardy and robust. July. 4 to 5 feet.

REGAL

Also called "Myriophyllum." One of the most beautiful, and one of the hardiest lilies in cultivation. "Lilium Regale is truly a royal lily, worthy of a place in every garden; it is a lover of loam and sunshine." A vigorous grower with sturdy stem; 4 to 5 feet high, densly covered with long, linear-lanceelote foliage. Center of flower flushed with yellow, shading to white at the outer edges: externally the flowers are streaked with brown, shaded through the almost translucent petals with a delightfully pearly tint; the contrast between the rich wine color of the reverse of the petals and the gold shading of the throat is extraordinarily beautiful. Very distinct. Thrives in any good rich soil; does well in limestone soil. Stem roots, July flowering.

SARGENTIAE

A magnificent introduction from China, vigorous and floriferous. The flowers are fun-

SPECIAL

FOR IMMEDIATE DELIVERY.

Lilium Henryi, bulblets ½ to ¾	10c Each
Lilium Tenuifolium, seedling bulbs	\$5.00 per 100

LILIES AND THEIR CULTURE

IN NORTH AMERICA

By W. N. Craig.

Packed full of practical information on growing lilies—outdoors in the hardy garden, under glass for cut flowers and pot plants, and in commercial plantings for propagation. For years a specialist in lilies, the author is among the few best qualified to write such a book. The chapter on "Lilies for Pot Culture and Forcing" alone is worth the price of the book to florists. For those growing lilies outdoors, the work is indispensable, for the chapters on general culture and for the "Notes on Varieties," arranged alphabetically, which occupy the second half of the book. Handsomely printed on dull-coated enamel paper throughout, containing thirty-five pages of plates of the principal varieties of lilies; bound in green cloth stamped in gold.

PRICE: \$3.00 POSTPAID

(Fill out the blank on the other side with your name and address and mail with remittance for immediate delivery.)

nel-shaped, milk-white internally with yellow throat, deep reddish-brown externally; delightfully fragrant; on four-foot stem; in the very front rank of hardy lilies. Also makes a grand pot plant. Flowers about three weeks later than Regale. Readily succeeds in any good rich soil. Stem-roots. July and August flowering.

TENUIFOLIUM

A small, slender growing lily, not more than 18 inches high, with bright scarlet flowers. One of the prettiest little lilies in cultivation. Early June. 12 to 18 inches.

TIGRINUM SPLENDENS

(The Tiger Lily)

A large form of the old garden favorite of old-fashioned gardens. The color is orangered, spotted purple on reflexed petals. Strong and hardy and the latest to bloom of all the lilies. Aug.-Sept. 4 to 5 feet.

WILLMOTTIAE

One of the finest garden lilies, although little known. Lovely in its graceful habit, slender foliage and heads of vivid orange-red flowers and kindly in its vigorous and thrifty constitution. July-August. 3 to 4 feet.

HYACINTHUS CANDICANS

The great summer Hyacinth, a noble plant, quite hardy, suitable either for greenhouse or outdoor cutivation, throwing up in late summer tall spikes 3 to 6 feet high, bearing from forty to sixty pure white bell-shaped flowers. This grand plant, associated in a bed of choice shrubs makes a splendid contrast. Plant the bulbs in March. It is easy of cultivation.

MONTBRETIA

Sun-loving bulbs in shades of yellow, orange and red; flowers from August to October. their fine foliage and free-flowering arching sprays make them invaluable in the summer border or for cutting, and the best varieties make fine pot plants.

TIGRIDIAS

(Pavonia speciosa)

Nothing can surpass the georgeous effectiveness of these summer flowering half hardy plants. The effect when a quantity of bulbs is massed together in a bed or in clumps is not easily forgotten. The bulbs should be planted in March and lifted in autumn. They are in a sense the flower of a day, but like many other short lived gems they crowd in to that brief period an intensity of brilliance and splendor never attained by any other long-lived flowers.

We ship parcel post in the Fall. Candidum August and September

THE LILY includes some most remarkable species, among which are some of the oldest denizens of our gardens. There are few who have not admired the gorgeous beauties of one or other of the many varieties of lilies that are here enumerated, or who have not been charmed by the stately purity of L. Candidnum and its sweet odor, or the magnificence of L. Regal.

There is no genus of plants better fitted for any garden than the lily; they can safely be called the noblest of garden flowers; their conspicuous blooms, striking colors and state-

ly forms appeal to the eye.

A REGAL LILY

Our farm is on Vashon Island, one mile from Tacoma Ferry landing. You are invited to come and see thousands of lilies in blossom, during July and August
